

Trusted Partner for Industrial Solutions since 1977

ELECTRICAL | LIGHTING | VENTILATION

www.zenithunited.com

“ We provide reliable and integrated ELECTRICAL, LIGHTING, and VENTILATION SOLUTIONS to meet the requirements of major industries in the Philippines. ”

ABOUT US

Since 1977, Zenith has grown to be a leading supplier for electrical materials in the country by carefully partnering with reputable global manufacturers and providing only quality products and service to all major industries nationwide.

From its humble beginnings as Zenith Electrical & Industrial Supply Corporation and its modest store in downtown Chinatown, Zenith has remained consistent in its commitment to customer service as it expanded its product portfolio to carry only leading global brands for electrical products.

In 2016, Zenith Electrical and the ventilation company Indola International Phils., Inc. consolidated and the company was renamed to **Zenith United Electric Corporation**.

In 2017, Zenith United acquired the cable company Zenith Wire & Conduit Inc., consolidating its core business and expanding its product portfolio to offer a complete range of integrated solutions for the electrical, lighting, and ventilation requirements of all major industries in the Philippines.

Moving forward, Zenith United remains steadfast in its commitment to deliver quality solutions that meet project requirements and benefit its valued customers. The company continues to listen to understand the specific requirements of each project and offer integrated solutions that achieve energy and operational efficiency, cost-savings, and workplace safety.

OUR SOLUTIONS

Explosion-protection

Lightning & Grounding

Motors & Drives

Ventilation

Cables

Conduits, Fittings, Boxes, & Raceways

Surveillance

EXPLOSION-PROTECTION

Hazardous workplaces in industries such as oil refineries, petrochemical processing plants, and coal mines operate to a certain extent with the presence of combustible gases and vapors. Electrical and lighting equipment that operate in these environment are required to have explosion proof/intrinsic safety technologies that could withstand extreme conditions and would not cause sparks that can ignite gases or vapors leading to an explosion.

We provide the most comprehensive line of electrical and lighting products designed and approved worldwide for safety in harsh surroundings.

INDUSTRIAL LIGHTING

Manufacturing industries are characterized by long operating hours where well planned lighting design and cost effective lighting systems contribute to productivity in the workplace to deliver optimal task performance, energy efficiency, low maintenance cost as well as improvement of personnel performance, health, and safety.

Our industrial lighting solutions offer a range of functional products designed to deliver excellent lighting performance, energy efficiency, and long lamp life.

LIGHTNING & GROUNDING

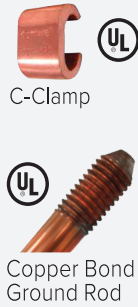

Protection against lightning and power surges as well as other electrical irregularities like transient overvoltage damage are critical for the security of personnel and property.

Our lightning and grounding solutions offer state-of-the-art technology that delivers maximum protection for uninterrupted operations, data security, building structure integrity and more importantly, personnel safety.

MOTORS & DRIVES

Machineries are becoming increasingly complex and advanced, which at times, make it difficult to determine what causes system malfunction. Since motors and drives are critical components of machines, keeping it running at peak efficiency is necessary. Dependable solutions that can improve processes, reduce cost of plant ownerships and minimize maintenance overhead are essential.

ABB's solutions for motors & drives are designed to optimize process efficiency, provide on-time system feedback while lowering environmental impact.

VENTILATION

In industrial, commercial, and livestock areas, it is important to have proper air ventilation which can supply correct air distribution, control moisture ingress and help in removing contaminants and odors to prevent air pollutants from affecting health and structural integrity.

Our ventilation solutions are designed to deliver the required air volume with minimum electrical consumption for a better and healthy environment.

CABLES

The appropriate use of cables is necessary for providing an end to end solution in various industries that have complex system requirements whether it is transmitting electrical signal or energy, as such, connectivity is an essential component in process automation of production facilities.

Our solutions offer diverse high quality cables designed to provide stable and dependable connection for all industries.

CONDUITS, FITTINGS BOXES AND RACEWAYS

Conduits and raceways manage and protect cables from physical and mechanical damages. This may require conduits or raceway to have durable properties in order to withstand corrosion in industrial environments.

McGill products are characterized by unique robust materials designed and internationally recognized to protect against mechanical and chemical damages.
