

WIN master

## Wireless Information Network (WIN)

### Features:

- Economical wireless-based Machine Data Collection system (MDC system)
- Analyse and optimise production processes
- Machine status and part count monitoring of a wide range of different machines
- Minimal installation effort and intuitive software

Monitoring has never been quick & simple with WIN

WIN slave

### Flexible Control System

## AndonCONTROL

### Features:

- A simple call system for various applications such as manual workstations
- Instant status display at the touch of a button to aid process optimisation
- Smart electronics enable the activation of up to eight different states
- For use with an integral signal tower
- Simple installation as no additional cable is required
- Universal power supply and interchangeable adaptors enable worldwide use

AndonCONTROL streamlines the delivery of material to manual workstations
